logical rules are generated (the faster a person generates solutions, the higher the probability of a correct answer—in a given period of time); + Increase the number of elements a person can keep track of in responding to an item (span capacity). Someone with a larger span capacity than someone else can take into account more figures without making errors and hence has a larger probability of a correct answer. Mechanical, Spatial and Abstract Reasoning ability is a key element in identifying aspects of person's general intelligence. That is why the vast majority of psychometric tests will have a component that relates to abstract and spatial reasoning. This ebook will provide a measure of educative ability or fluid intelligence which is relatively independent of specific learning acquired in a particular cultural or educational context.
