Power weights are a simple class of Muckenhoupt weights, but we have a long way to go in finding a

sufficient supply of nontrivial Muckenhoupt weights. We have in particular to prove the so-called reverse Milder inequality, which implies that if w is a weight in $A_p(\lambda)$ then $w^{1+\lambda}$ belongs to $A_p(\lambda)$ for all sufficiently small $\lambda > 0$ (“stability” of Muckenhoupt weights).
