Approach your cat quietly and slowly, avoiding sudden movements. The best way of lifting an injured cat is to put one hand under the chin on the front of the chest, and the other behind the hindlegs. If the cat seems frightened and potentially aggressive, it is better to lift the cat in a thick towel, but be careful as cats can bite through towels. If you are dealing with an unknown cat, you may be able to encourage the animal into a shed or garage before seeking help.

The average life expectancy of cats was about ten years just a few decades ago. Currently many live for close to 20 years through improved nutrition, vaccination and with improved standards of care. A large number of people keep their cats vaccinated by visiting veterinary services while maintaining regular treatment programs against parasites, for example, fleas, and worms. However, a huge challenge is faced when deciding when a cat needs veterinary care for varying conditions and what conditions are termed as emergencies. Before deciding if and when your cat needs veterinary care, it is important to undertake some few first aid measures. The experts reveal how to interpret and understand your cat's symptoms and what steps to take to ensure its health. This comprehensive and practical book is designed to assist cat owners in understanding their pets' bodies and health based on signs and symptoms of disease, and in determining the most common medical problems that might cause particular symptoms. Adopting the "decision chart" format from popular symptom guides for human ailments, such as the American Medical Association's Guide to Your Family's Symptoms and Take Care of Yourself, five leading veterinarians have designed a user-friendly chart system that will guide a pet owner from noting the symptom and observing the cat's behavior to understanding the associated signs of an illness, the possible conditions, and the best steps to take. Filled with more than 150 charts in an easy-to-follow two-color format and medical drawings, The Veterinarians' Guide to Your Cat's Symptoms is the indispensable reference for cat owners. It not only considers the problems of sick and injured pets, but also addresses the needs of healthy animals. It has all the information a cat owner needs: , What a healthy cat should look like , Flow charts to the 200 most common symptoms , Behavioral issues, such as spraying and clawing , Emergency first aid, including transporting an injured cat , A glossary of veterinary diagnostic tests and medical terms With this unique combination of medical information and advice, plus an innovative chart system, The Veterinarians' Guide to Your Cat's Symptoms will ensure that your cat really does have nine lives.
