In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice: community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This “deeply immersive novel” (The Washington Post) from the author of the award-winning Preparation for the Next Life is an “epic coming-of-age tale filled with pain, heartache, fear, and undying love” (The Associated Press), as a young man’s yearning to protect his dying mother requires him to risk destroying his estranged, enigmatic, powerful father. “From its hypnotic opening pages, we find ourselves in the sure hands of a roaming omniscient narrator, one who knows intimately the beating hearts of its two central characters”—André Dubus III, The New York Times Book Review
Corey Goltz grows up in the working-class outskirts of Boston as the only child of Gloria, whose ambitions were derailed early but who has always given her son everything she can. Corey, restless, dreams of leaving home for a great adventure. Instead, when he is fifteen, the world comes crashing down upon him, when Gloria is diagnosed with ALS and, too late, his estranged father, Leonard—a man of great charisma but dubious moral character—re-enters the picture. Determined to be his mother’s hero at any cost, Corey begins shouldering responsibility for her expensive medical care, pushing himself to his physical and emotional limits as her disease cruelly progresses. And as Leonard’s influence over Corey grows, Corey must dismantle the myth of his father’s genius and confront the evil that lurks beneath it. Gritty, visceral, and profoundly stirring, The War for Gloria tells the story of a young man, straddling childhood and adulthood, whose yearning to protect his mother requires him to risk destroying his father. An indelible work from a strikingly original voice in American fiction.

“This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It’s also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language.” With a reporter’s eye and an insider’s perspective, Eric Garcia shows what it’s like to be autistic across America. Garcia began writing about autism because he was frustrated by the media’s coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn’t look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don’t need to be fixed. In We’re Not Broken, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ+ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

In its 114th year, Billboard remains the world’s premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted digital, and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

A raw and funny memoir about sex, dating, and relationships in the digital age, intertwined with a brilliant investigation into the challenges to love and intimacy wrought by dating apps, by firebrand New York Times–bestselling author Nancy Jo Sales At forty-nine, famed Vanity Fair writer Nancy Jo Sales was nursing a broken heart and wondering, “How did I wind up alone?” On the advice of a young friend, she downloaded Tinder, then a brand-new dating app. What followed was a raucous ride through the world of online dating. Sales, an award-winning journalist and single mom, became a leading critic of the online dating industry, reporting and writing articles and making her directorial debut with the HBO documentary Swiped: Hooking Up in the Digital Age. Meanwhile, she was dating a series of younger men, eventually falling in love with a man less than half her age. Nothing Personal is Sales’s memoir of coming-of-middle-age in the midst of a new dating revolution. She is unsparingly honest about her own experience of addiction to dating apps and hilarious in her musings about dick pics, sexting, dating FOMO, and more. Does Big Dating really want us to find love, she asks, or just keep on using its apps? Fiercely feminist, Nothing Personal investigates how Big Dating has overwhelmed the landscape of dating, cynically profiting off its users’ deepest needs and desires. Looking back through the history of modern courtship and her own relationships, Sales examines how sexism has always been a factor for women in dating, and asks what the future of courtship will bring, if left to the designs of Silicon Valley’s tech giants—especially in a time of social distancing and a global pandemic, when the rules of romance are once again changing.

A NEW YORK TIMES NOTABLE BOOK OF THE YEAR • NEW YORK TIMES BEST SELLER • A grand, devastating portrait of three generations of the Sackler family, famed for their philanthropy, whose fortune was built by Valium and whose reputation was destroyed by OxyContin. From the prize-winning and bestselling author of Say Nothing The history of the Sackler dynasty is rife with drama—baroque personal lives; bitter disputes over estates; fistfights in boardrooms; glittering art collections; Machiavellian courtroom maneuvers; and the calculated use of money to burnish reputations and crush the less powerful. The Sackler name has adorned the walls of many storied institutions—Harvard, the Metropolitan Museum of Art, Oxford, the Louvre. They are one of the richest families in the world, known for their lavish donations to the arts and the sciences. The source of the family fortune was vague, however, until it emerged that the Sacklers were responsible for making and marketing a blockbuster painkiller that was the catalyst for the opioid crisis. Empire of Pain begins with the story of three doctor brothers, Raymond, Mortimer, and the incalculably energetic Arthur, who weathered the poverty of the Great Depression and appalling anti-Semitism. Working at a barbaric mental institution, Arthur saw a better way and conducted groundbreaking research into drug treatments. He also had a genius for marketing, especially for pharmaceuticals, and bought a small ad firm. Arthur devised the marketing for Valium, and built the first great Sackler fortune. He purchased a drug manufacturer, Purdue Frederick, which would be run by Raymond and Mortimer. The brothers began collecting art, and wives, and grand residences in exotic locales. Their children and grandchildren grew up in luxury. Forty years later, Raymond’s son Richard ran the family-owned Purdue. The template Arthur Sackler created to sell Valium—co-opting doctors, influencing the FDA, downplaying the drug’s addictiveness—was employed to launch a far more potent product: OxyContin. The drug went on to generate some thirty-five billion dollars in revenue, and to launch a public health crisis in which hundreds of thousands would die. This is the saga of three generations of a single family and the mark they would leave on the world, a tale that moves from the bustling streets of early twentieth-century Brooklyn to the seaside palaces of Greenwich, Connecticut, and Cap d’Antibes to the corridors of power in Washington, D.C. Empire of Pain chronicles the multiple investigations of the Sacklers and their company, and the scorched-earth legal tactics that the family has used to evade accountability. Empire of Pain is a masterpiece of narrative reporting and writing, exhaustively documented and ferociously compelling. It is a portrait of the excesses of America’s second Gilded Age, a study of impunity among the super elite and a relentless investigation of the naked greed and indifference to human suffering that built one of the world’s great fortunes.

“Through candor and comprehensiveness, Jackson writes a convincing revisionist take, in which he emerges as an excellent coach . . . highly readable . . . reflects Jackson’s polymathy.” —The New York Times Book Review
“Part sports memoir, part New Age spirit quest, part pseudo-management tract . . . But the primary thing with Jackson—as with all the old bards, who were also known for repeating themselves—is the voice.” —Sam Anderson, The New York Times Magazine
A New York Times Bestseller
The inside story of one of basketball’s most legendary and game-changing figures
During his storied career as head coach of the Chicago Bulls and Los Angeles Lakers, Phil Jackson won more championships than any coach in the history of professional sports. Even more important, he succeeded in never wavering from coaching his way, from a place of deep values. Jackson was tagged as the “Zen master” half in jest by sportswriters, but the nickname speaks to an important truth: this is a coach who inspired, not goaded; who led by awakening and challenging the better angels of his players’ nature, not their egos, fear, or greed. This is the story of a preacher’s kid from North Dakota who grew up to be one of the most innovative leaders of our time. In his quest to reinvent himself, Jackson explored everything from humanistic psychology and Native American philosophy to Zen meditation. In the process, he developed a new approach to leadership based on freedom, authenticity, and selfless teamwork that turned the hypercompetitive world of professional sports on its head. In Eleven Rings, Jackson candidly describes how he:
• Learned the secrets of mindfulness and team chemistry while playing for the champion New York Knicks in the 1970s
• Managed Michael Jordan, the greatest player in the world, and got him to embrace selflessness, even if it meant losing a scoring title
• Forged successful teams out of players of varying abilities by getting them to trust one another and perform in sync
• Inspired Dennis Rodman and other “uncoachable” personalities to devote themselves to something larger than themselves
• Transformed Kobe Bryant from a rebellious teenager into a mature leader of a championship team. Eleven times, Jackson led his teams to the ultimate goal: the NBA championship—six times with the Chicago Bulls and five times with the Los Angeles Lakers. We all know the legendary stars on those teams, or think we do. What Eleven Rings shows us, however, is that when it comes to the most important lessons, we don’t know very much at all. This book is full of revelations: about fascinating personalities and their drive to win; about the wellsprings of motivation and competition at the highest levels; and about what it takes to bring out the best in ourselves and others.
