In short, digital TV is a gateway to the world of interactive
digital media. Digital TV brings consumers into the television
service arena and offers them new degrees of freedom.
However, as the service and multimedia content types
diversify and the services and their content increase,

television is facing many of the same challenges of complexity and information overflow faced by other digital media.

Digital Interactive TV and Metadata - Arthur Lugmayr ...

The digital broadcast item model (DBIM) catalyzes the digital item methodology of MPEG-21 into a new converging concept for deploying metadata-based services in digital TV. The idea of the digital broadcast item model (DBIM) goes back to the year 2001, when the IEEE standard for the learning object model (LOM) was presented at a conference in ...
