Step 2: Track down the best evidence. This doesn't mean ask another SLP, get out your old (or even new) textbooks, or. . . Step 3: . . .

~~Evidence-based treatment of stuttering – I. Definition and –~~

Abstract. Assertion-based treatments for stuttering have historically been more popular than evidence-based treatments. In this paper it is argued that the use of evidence-based treatments for stuttering is professionally empowering for clinicians, but that the use of assertion-based treatments is a circular process that inhibits professional development.

~~Evidence-based treatment of stuttering – IV. Empowerment –~~

Abstract. At the heart of evidence-based practice in stuttering treatment are four issues: (1) the collection of data to inform treatment; (2) the long standing concern with maintenance of treatment gains; (3) the need to demonstrate accountability to clients, payers and our profession as service providers; and (4) the desire to advance theoretical knowledge.

~~Evidence-based treatment of stuttering – III. Evidence –~~

A Good Example of an Evidence-Based Stuttering Treatment Finally, check out this evidence-based stuttering treatment t, that has been well researched and is now provided by the Power Stuttering Center. The MPI (Modifying Phonation Intervals) program for adults and teenagers who stutter takes two weeks in the clinic.

~~Evidence-Based Stuttering Treatment – Power Stuttering Therapy~~

Building on this premise, Ingham and Cordes (1997) proposed a three-factor model of stuttering treatment outcome evaluation based on speech performance, speaking situations, and time that incorporates clients' self-judged acceptability of treatment changes in combination with observer-based measures. Thus, self-measurement serves as the basis for determining the clinical significance of a treatment change from the client's perspective.

~~Evidence-based treatment of stuttering – II. Clinical –~~

This book is the result of a "State-of-the-Art-Conference" held at the University of Georgia dedicated to the evidence-based treatment of stuttering. An international group of prominent fluency researchers and clinicians were invited to present and discuss current data and issues related to the treatment of stuttering.

At the heart of evidence-based practice in stuttering treatment are four issues: (1) the collection of data to inform treatment; (2) the long standing concern with maintenance of treatment gains; (3) the need to demonstrate accountability to clients, payers and our profession as service providers; and (4) the desire to advance theoretical. . .

~~Evidence-based treatment of stuttering – III. Evidence –~~

Method. A brief review of the history and development of FS and SM is provided. It illustrates that both can be justified as evidence-based treatments, each treatment seeking evidence of a different kind: FS seeks evidence concerning treatment outcome, and SM seeks evidence concerning the nature of the stutter event.

~~Evidence-Based Treatment and Stuttering – Historical –~~

Evidence-based practice also specifies a general approach, not a dependent variable or a particular treatment program; an evidence-based approach to the treatment of stuttering does not, in itself, require using percent syllables stuttered as a treatment outcome measure or require the use of behavioral or fluency-shaping treatments (see Ingham & Cordes, 1997, Ingham & Riley, 1998). As described above and in other sources, evidence-based practice actually involves all the complexities of. . .

~~Evidence-based treatment of stuttering – V. The art of –~~

Evidence-based speech pathologists want to provide clients who stutter with good quality information about their treatment options, the risks and benefits of each treatment, and treatment recommendations that incorporate each client's values, needs, preferences and characteristics.

~~(PDF) Evidence-Based Treatment and Stuttering – Historical –~~

An evidence-based framework can be described as an empirically-driven, measurement-based, client-sensitive approach for selecting treatments. It is believed that using such a framework is more likely to result in a clinically significant outcome. For this paper, a clinically significant outcome was defined as a meaningful treatment change.
