Contact Toyota or file a complaint with your states attorney general on the stealership. My neighbor had a similar issue happen to him not Toyota though. He battled it out with the dealership. He contacted the PA attorney general and eventually the stealership had to purchase the vehicle back since they shouldn't have sold it in that condition.

Its making me think Toyota was a mistake, my prior F150 went 280,000 miles without incident. After the repair I will report back and indicate if it fixed the issue. Appears Toyota had issues with the ABS ACTUATOR ASSEMBLY in Prius and other models. Are othe Tundra owners having to replace thier ABS ACTUATOR ASSEMBLY?

!Spectacular . . . a majestic collection that captures the drama of everyday existence in war zones around the world. . . . There is no disputing the impact of this revelatory collection.¶!BookPage From the Pulitzer Prize-winning photojournalist and New York Times bestselling author, a stunning and personally curated selection of her work across the Middle East, South Asia, and Africa Pulitzer Prize/winning photojournalist and MacArthur Fellow Lynsey Addario has spent the last two decades bearing witness to the world's most urgent humanitarian and human rights crises. Traveling to the most dangerous and remote corners to document crucial moments such as Afghanistan under the Taliban immediately before and after the 9/11 attacks, Iraq following the US-led invasion and dismantlement of Saddam Hussein's government, and western Sudan in the aftermath of the genocide in Darfur, she has captured through her photographs visual testimony not only of war and injustice but also of humanity, dignity, and resilience. In this compelling collection of more than two hundred photographs, Addario's commitment to exposing the devastating consequences of human conflict is on full display. Her subjects include the lives of female members of the military, as well as the trauma and abuse inflicted on women in male-dominated societies; American soldiers rescuing comrades in the Korengal Valley of Afghanistan, and Libyan opposition troops trading fire in Benghazi. Interspersed between her commanding and arresting images are personal journal entries and letters, as well as revelatory essays from esteemed writers such as Dexter Filkins, Suzy Hansen, and Lydia Polgreen. A powerful and singular work from one of the most brilliant and influential photojournalists working today, Of Love & War is a breathtaking record of our complex world in all its inescapable chaos, conflict, and beauty.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our livesa [compulsively readable parable for the 21st century] (Vanity Fair). When Mae Holland is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world!even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.
