Brianna Karp entered the workforce at age ten, supporting her mother and sister throughout her teen years in Southern California. Although her young life was scarred by violence and abuse, Karp stayed focused on her dream of a steady job and a home of her own. By age twenty-two her dream became reality. Karp loved her job as an executive assistant and signed the lease on a tiny cottage near the beach. And then the Great Recession hit. Karp, like millions of others, lost her job. In the six months between the day she was laid off and the day she was forced out onto the street, Karp scrambled for temp work and filed hundreds of job applications, only to find all doors closed. When she inherited a thirty-foot travel trailer after her father's suicide, Karp parked it in a Walmart parking lot and began to blog about her search for work and a way back.

"Homelessness is a perennial topic of concern at libraries. In fact, staff at public libraries interact with almost as many homeless individuals as staff at shelters do. In this book Dowd, executive director of a homeless shelter, spotlights best practices drawn from his own shelter's policies and training materials" --

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

This book provides social workers, outreach clinicians, case managers, and concerned community members with a pretreatment guide for assisting homeless couples, youth, and single adults. The inter-relationship between Homeless Outreach and Housing First is examined in detail to inform program

development and hands on practice. "Pretreatment Guide for Homeless Outreach & Housing First" shares five detailed case studies from the field to elucidate effective ways of helping and to demonstrate how the most vulnerable among us can overcome trauma and homelessness. Readers will:

- Expand their assessment skills and discover new interventions for helping people who have experienced long-term or chronic homelessness.
- Understand and be able to integrate the stages of common language construction with their own practice.
- Learn about the positive measurable impact of a Housing First approach and its moral, fiscal, and quality of life implications.
- Understand how to better integrate program policy and supervision with Homeless Outreach & Housing First initiatives.
- Learn how to utilize a Pretreatment Approach with couples, youth, and unaccompanied adults experiencing untreated major mental illness and addiction.

"Jay S. Levy's book is essential reading to both people new to the movement to end homelessness and folks who have been in the trenches for many years. Learn how to do effective outreach with the chronic homeless population, and the ins and outs of the Housing First model. The personal stories and the success cases will give inspiration to work even harder to help both individuals and for ending homelessness in your community." Michael Stoops, Director of Community Organizing National Coalition for the Homeless, Washington, DC Learn more at www.JaySLevy.com Another empowering book from Loving Healing Press www.LovingHealing.com

In 2000, HUD, in recognition that any solution to homelessness must emphasize housing, targeted its McKinney-Vento Act homeless competitive programs towards housing activities. This policy decision presumed that programs such as Medicaid, TANF and General Assistance could pick up the slack produced by the change. This study examines how 7 communities sought to improve homeless people's access to mainstream services following this shift away from funding services through the Supportive Housing Program. Provides communities with models and strategies that they can use. Highlights the limits of what even the most resourceful of communities can do to enhance service and benefit access by homeless families and individuals.

This book presents an unflinching investigation of homelessness in the United States—a problem that has been with us since the arrival of the first English settlers nearly 400 years ago.

- * Primary documents, including government reports, selections from novels, historical photographs, personal reminiscences, and more
- * Dozens of illustrative photographs
- * Subject-specific bibliographies
- * A guide to relevant reference materials

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

Advocating a strategic approach, this book shows how to form a plan, secure funding and support, and create effective programs for adults, children, and youth who are experiencing homelessness. You'll find guidance for creating partnerships, training staff, and advocating. Taking a holistic approach that will help you to better understand the experience of homelessness within the context of your library community, this book offers new strategies and tools for addressing the challenge of meeting the needs of the entire community, including those who are unstably housed. With basic facts, statistics, and conversations about homelessness, the author makes a case for why libraries should provide support, explains exactly which needs they may be able (or unable) to meet, and shows how you can do that as a natural part of the library services you already provide. Topics discussed include trauma-informed care, harm reduction, and mental and physical health challenges; brief stories and concrete examples illustrate the principles and guidelines discussed. Citing innovative services such as Dallas Public Library's "coffee and conversation" program and San Francisco Public Library's social worker program, the book offers both food for thought and tools for action as public librarians strive to understand and meet the needs of a population that has traditionally been stereotyped and excluded.

- * Discusses specific short-term and long-term actions that libraries can take to better address the needs of community members who are experiencing homelessness
- * Outlines steps libraries can take to balance the needs of all library users
- * Shows how to identify and work with potential partners
- * Describes new ways libraries can and are addressing common barriers to library services for those experiencing homelessness

This 1996 Nat. Survey of Homeless Assist. Providers & Clients (NSHAPC) is a landmark study. It was designed to provide updated information about the providers of homeless assistance & the characteristics of homeless persons who use the services. The survey is based on a statistical sample of 76 metropolitan & non-metropolitan areas, including small cities & rural areas. Data for the survey were collected between Oct. 1995 & Nov. 1996. Chapters: design overview; overview of homeless clients; comparing currently with formerly homeless clients & other service users; homeless assistance programs;

sampling areas; & program definitions. Charts & tables.

How to help the most disenfranchised of our citizens, those displaced and sometimes discarded in our society. As the growing epidemic of homelessness grips America, author Tina Babcock gives insight to the causes and solutions. It is a practical guide for those wanting to make a difference with this stigmatized and often feared population within our communities. After more than a decade of working with both temporarily displaced and chronically homeless individuals she gives a compassionate and practical view of what it takes to be effective. Whether you have a relative that has ended up on your couch or you are running an outreach to homeless individuals, you'll find this a valuable resource.
