IP telephony has the potential to lower long distance rates by a factor IP (Internet Protocol) telephony is simply voice sent over the internet, rather than the traditional phone system. IP telephony has the potential to lower long distance rates by a factor of ten, and can combine voice and data servicesIT people are being asked to implement or investigate IP telephony solutions.

IP Telephone Demystified by Ken Camp - Goodreads

IP Telephony, the transmission of voice over the internet, is a disruptive technology with the potential to revolutionize the long distance voice market. This book will show IT professionals and managers how IP Telephony can benefit them, and how to decide when it makes sense to deploy, and when it doesn't.
