Ocean Safety Ltd - Bilge alarms

Many regulations now call
for a bilge level alarm
system to be fitted.

Alternatively, a simple
float switch and buzzer /
light will provide a similar
warning. Bilge water level
alarms activate when the
bilge water is detected at a
specified level. An audible
and visual alert is then
produced to inform that the
bilge water requires pumping

The better high water alarm systems works on a normally closed circuit, if bilge water level rises the sensor/float switch opens the circuit and triggers the alarm. The benefit of this system is if a sensor wire breaks the alarm goes off to warn you of the problem, plus the test button on the Johnson and others like it, only test the buzzer and light, nothing else.
