"Migration and the Externalities of European Integration analyzes the extra-European dimension of the European Union's (EU) migration policies and the mechanisms developed to enforce the EU's policy decisions. While previous scholarship has tended to overlook the consequences of Europeanization on actors outside the EU this

work scrutinizes the foreign policy dimension in EU migration policies and highlights the Union's complex role as an international actor. Written by scholars of migration policy, the essays discuss the impact of EU asylum and refugee policy on Norway, Switzerland, Eastern Europe, Euro-Mediterranean, and EU-Turkish relations and the effect of migration on European immigration controls and welfare policy. This comprehensive treatment of transnational migration will be a valuable resource for students of international affairs, European integration, and international organization."

Holography reviews advances in the field of holography and its various applications in areas such as interferometry, microscopy, and acoustics. Topics range from acoustic holography to image multiplexing, formation of images in holography, and holography by computer. Some experiments based on Gabor's holography are also presented. This book is comprised of five chapters and begins with an overview of the fundamentals of holography, with particular reference to spatial and

temporal coherence, diffraction at finite and infinite distances, and filtering of spatial frequencies. The reader is then introduced to the principles and applications of holography, focusing on the geometric optics and aberrations of holograms as well as interferometry and microscopy. The following chapters explore how images are produced and reconstructed using a hologram and explain how to detect the differences between two images. Three main types of synthetic holograms are also considered: binary holograms, holograms with several intensity levels, and the holograms called kinoforms.
