Chapter 4 Solutions | Engineering Mechanics: Statics ...

4-1. If A, B, and D are given vectors, prove the distributive law for the vector cross product, i.e., $A \times (B + D) = (A \times B) + (A \times D)$. Consider the three vectors; with A vertical. Note obd is perpendicular to A. Also, these three cross products all lie in the plane obd since they are all perpendicular to A.
