Medical practitioners, students, and anyone else who requires a vast and detailed working knowledge of human physiology should get this self-test coloring book. It includes: More than 350 detailed line illustrations that clearly convey the structures and functions of the body and its systems, and how they interrelate Succinct text that explains the physiology of each body area that is illustrated Labels left blank so that you can test your knowledge of anatomical names as you color Pages that lay flat for easy coloring Answers located at the bottom of the page As you color in the illustrations, you ' ll imprint the shape, locations, and function of each body part and system, making memorization, visualization, and recall much easier later. It makes a great educational and study tool because the completed drawings provide a concise, interactive reference to human physiology that can be utilized again and again.

Learn human anatomy while you color! Learning and naming the many parts and systems of the human body can be a daunting task for student nurses, as well as for other students preparing for careers in the various scientific and medical professions. This highly original book helps make learning a great deal easier. Hundreds of anatomically accurate line illustrations show human body parts and readers are encouraged to shade them in with colored pencils. It's a simple physical task intended to imprint on students' memories the shape and location of each body part, making later visualization and memory retention much easier. The book has a spiral binding hidden beneath the cover's spine so that pages lie flat for easy coloring. Other features include: New to this edition: clinical points text boxes to illustrate the medical significance of the structure under study 16 new pages of text Extra-heavy paper that minimizes show-through Every body system and part presented All parts labeled with correct anatomical names The Anatomy Student's Self-Test Coloring Book is a must-have learning tool for all students and practitioners who require detailed anatomical knowledge. In addition to a substantial and instructive text, it features 144 two-color pages.

Students preparing for careers in various medical professions will value this highly detailed and profusely illustrated reference guide. Fourteen chapters show, label, and define all human body regions and parts and describe physiological processes. The chapter titles are: Body Overview Cells and Tissues The Skeletal System The Muscular System The Nervous System Special Sense Organs The Lymphatic System The Circulatory System The Respiratory System The Digestive System The Urinary System The Endocrine System The Reproductive System The book's fifteenth and final chapter provides students with a workbook that presents labeled line illustrations of the human body's muscle and skeletal systems. Students are encouraged to color in individual muscles and bones as an effective aid to memorizing the names and locations of each part. More than 500 color illustrations.

Looking for an easy, fun and effective way to demystify the structures of the human body? Coloring the human body and its physiology is the most effective way to study the structure and functions of our anatomy. You assimilate information and make visual associations with key terminology when coloring in the Anatomy & Physiology Coloring Book, all while having fun!
