Critical Issues in Ecotourism seeks to shake the current stagnant literature on the subject of ecotourism out of a state of complacency. Drawing upon emerging insights provided by pre-eminent scholars in the field it identifies and comprehensively addresses current critical issues. Accessible to both academic and non-academic audiences, it provides the reader with the following: * A critical, direct and hard hitting analysis of the real issues that apply to the field of ecotourism *Contributions from prominent international scholars that address issues of relevance to a diverse and international readership * Dissemination of the scholarly works of social and natural science addressing this field * A collection of works by outstanding international scholars, in a comprehensively planned and integrated book incorporating rigorous scientific insights in specialised fields of research, for example, identifying and protecting critical habits where tourists engage with endangered species. Critical Issues in Ecotourism is an important and ground breaking contribution set to expose the increasingly mythologized field of ecotourism.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and warnings for the home mechanic; color spark plug diagnosis and an easy to use index.
