Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. "A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world." —Michael Lewis

It is no secret that a well maintained, clean and appealing home has a far better chance of selling, at a higher price and more quickly than a home that could use some work and attention. Keep in mind that first impressions always create lasting impressions - and nothing exemplifies this better than real estate. Of course, this does not mean you need to embark on a major renovation project in order to sell your home. There would be no guarantees you would be able to recoup the costs of such a large and expensive project anyway.
