For student reflection to be meaningful, it must be metacognitive, applicable, and shared with others. If students are metacognitive about inquiry, then they're thinking about exactly how they are going to phrase their focus question; if they're metacognitive about collaboration, then they're considering how their introvert or extrovert personality will affect the group.

Reflection On Metacognition - 799 Words | Bartleby

Reflective clinical reasoning in nursing practice depends on the development of both cognitive and metacognitive skill acquisition. This skill acquisition is best accomplished through teaching learning attention to self-regulation learning theory. A critical analysis of the literature in the areas of critical thinking and reflective practice are described as a background for contemporary work with self-regulated learning theory.

Promoting cognitive and metacognitive reflective reasoning ...

Metacognition and self-regulation approaches have consistently high levels of impact, with pupils making an average of seven months additional progress. These strategies are usually more effective when taught in collaborative groups so that learners can support each other and make their thinking explicit through discussion.

Metacognition and self-regulation | Toolkit Strand ...

A major feature of how we naturally learn, according to self-determined learning (heutagogy), is metacognition. Specifically this involves reflection that leads to double loop and even triple loop learning (see Blaschke, 2012; Hase & Kenyon, 2013). Although having a history going back to Dewey, it was Don Schon who first gave prominence to the notion of reflection as a practice in his book The Reflective Practitioner in 1983.

Using Reflection and Metacognition to Improve Student ...

Metacognition and self-reflection Self-reflection enhances self-awareness, as it makes it easier to be able to monitor one's performance (which is a central tenant of metacognition). Benjamin Franklin reportedly kept a journal where he would reflect at the end of each day what he did well and what he could do better.

How to improve Metacognition in the classroom | InnerDrive ...

Reflection involves pausing to think about a task. It is usually a cyclical process where we reflect, think of ways to improve, try again then go back to reflection. Reflection is metacognitive only if you consciously reflect on what your thought processes were and how to improve upon them next time.
