Volvo Penta's Inboard Performance System (IPS) stunned the boating world when it was first unveiled in 2005 – and it is still the benchmark for excellence in the industry. The company (literally) turned propulsion around and now this daring design is now on display in New York as part of an extension of NYCxDESIGN.

Volvo Penta's Inboard Performance System (IPS): a design ...

For five years Volvo Penta's Forward Drive system has made its way onto more than 50 models of boats. It's turned out to be a versatile drive that fulfills the watersports needs of many boaters.

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO
