The book is a must read for policy makers, academics, university administrators and post graduate research students in the broad field of education and in higher education studies in particular. The book brings together a wealth of information regarding the imperatives of transformation in Africa’s higher education systems. Not only do some of the chapters provide critical discussion about the conceptualisation of transformation, the majority of the chapters reflect on empirical evidence for transformation in diverse fields of mathematics, science, gender, the training of doctoral students and the governance and management of universities. This central theme of sustainable change and reform runs across the chapters of the book. For students, the book provides exemplars of practical research in higher education. For scholars in higher education and policy makers, specific issues for reform are identified and discussed.

This book gathers high-quality research papers presented at the 2nd AUE international research conference, AUEIRC 2018, which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes: risk assessment in agriculture, corporate social responsibility and the role of intermediaries, the impact of privatizing health insurance, political events and their effect on foreign currency exchange, the effect of sustainable HR practices on financial performance, sustainability integration in the supply chain and logistics, gender inequality in the MENA economies, the panel data model, the model of sustainable marketing in the era of Industry 4.0, micro-enterprises as a tool for combating unemployment, the impact of financial education and control on financial behavior, measuring financial and asset performance in agricultural firms, a comprehensive strategic approach to sustainability in the UAE, sustainability and project finance, HR analytics, FaD or fashion for organizational sustainability, a conceptual framework of sustainable competitive advantages, psychology of organizational sustainability, Blockchain technology and sustainability, veganism and sustainability, institution building from an emotional intelligence perspective, sustainable concrete production using CWP, occupants’ behavior and energy usage in Emirati houses, the effect of shop lighting on consumer behavior, multimedia applications in digital transformation art, integrating biomimicry principles in sustainable architecture, experimental sustainable practices in fashion education, technology-assisted student-centered learning for civil engineering, and a 10-step design process for architectural design studios. All contributions present high-quality original research work, findings and lessons learned in practical development.

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

The glue between efficient productivity and profitability is great decision-making. I do not think that a farmer has ever sown rice and harvested corn. In computers, the most common language is GIGO, meaning garbage in, garbage out. Usually, the decisions we make are our personalities, and yet very few people accept responsibility for their actions, their failures in business, or in any endeavor in which they have failed. They desire to blame others without remembering GIGO. I have articulated the mystery that surrounds the lone decision-maker or the CEO who enjoys lonely decision-making and blaming his or her failures on the engineer or the accountant in his company. The new name for decision-making is participative decision-making. In this, the senior officers take part, but separately—the engineers, accountants, supervisors, workers and maintenance people form another group. Both platforms must have a dialogue format; there must be a writer or clerk, a vote taken on each discussion for its authenticity or viability, and in the end, the senior officers must compare their notes with the second group so that amendments can be made where necessary. The final product is now ready to be presented before the board of directors as a formal decision for the company. In a smaller company, this activity stops with the owner, but the owner must understand that two heads are usually better than one. The CEO and his group must not be taken over by egos; the only time for pride in business is when business is doing well financially. Even then, business needs a lot of careful activity because “pride goes before a fall.” It is good to entrust the CEO with the decision-making responsibility, but it is the biggest risk a business can take because business is a collection of ideas. Therefore, it a discipline of collective learning and inquiry. Any student, manager, or business owner who wants to use participative decision-making skills in his or her business or as a consultant in participative decision-making should attend a workshop at least twice and read about participative decision-making thoroughly and practice it from case studies.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this very useful analysis of constitutional law in Nigeria provides essential information on the country’s sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book, the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background, the role of treaties, legislation, jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in Nigeria will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law.

This book reviews the current trends and challenges of regional integration and trade in Africa. It provides valuable policy recommendations aimed at stimulating the debate among the government, private sector and development community on the ways to promote regional trade for Africa's economic development.

International Marketing Compact offers a new perspective in teaching international marketing. The authors address issues in a novel way by bringing in cases from advanced and emerging markets. In this connection they also discuss technological requirements of the 21st century and how these developments necessitate a change in looking at international marketing issues. The individual chapters follow the necessary steps to develop and implement projects successfully in the international market place. The knowledge, which is provided for both students and practitioners, is well balanced in terms of theoretical input and managerial application. This is the result of numerous examples presented in this book not only from Europe, but also from other markets throughout the world. The book is addressed to various student groups: those in a bachelor’s program studying business, economics and international trade can well use the book to gain a broad and current perspective on trends in international marketing theory and practice. Those in a master’s program for business, economics and international trade can use the book as a guide for building a theoretical background for their term projects and the case studies they analyze. Those at the PhD level in the same or similar disciplines can take a compact look at 21st century international marketing. It is also beneficial for international students, for example, for Erasmus students at European universities, who are building a common international marketing background and perspective that they can take back to their studies at their home universities.

This book will appeal not only to historians and geographers, but to many who maintain a deep interest in the British countryside and its past, and to those who continue to share a fascination for the Second World War, in particular the 'home front'. It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago.
